

Facing cancer can be scary.

That's why the City and its unions have partnered with Best Doctors to provide a free expert medical review for employees and their families diagnosed with cancer.

The next step after a cancer diagnosis should be an expert medical review. Best Doctors provides an expert medical review on your existing cancer diagnosis and treatment plan by bringing together the best medical minds in the world with the most advanced cognitive technology. Our carefully selected expert oncologists either confirm the accuracy of your existing diagnosis and treatment plan or provide detailed recommendations in an in-depth report.

Be certain about your next step with Best Doctors.

Best Doctors' services are available to those covered under the EmblemHealth GHI-CBP plan who have been diagnosed with cancer at no cost as an integral part of the City and its unions' benefits package

How it works:

Contact Best Doctors and a Member Advocate schedules time with you on the phone to collect information about your current health status, medical history and medical records information.

Simply sign an electronic medical records release, and Best Doctors will collect your records and select the most appropriate expert for your condition.

If you have been diagnosed with a qualifying cancer¹, a highly trained clinician will also run your oncology-specific data through the IBM Watson application. This tool helps analyze medical records, identify top potential evidence-based treatment options and evaluate specific qualifying criteria to identify any available clinical trials.

The results will be included in a clinical summary and provided to a carefully selected expert oncologist.

Once the selected expert has reviewed your full medical case and answered your questions, you will be provided a report that either confirms your diagnosis and treatment plan or recommends a change

Best Doctors will walk you through the report. You can share the report and findings with your treating physician(s) if you choose to, and make your next decision with confidence
